

CAPABILITIES STATEMENT

EDCI is a General Contracting company that is headquartered in Knoxville, Tennessee. Our company started in 2015 specializing in interior finishes. Over the years we realized in order to have sustained growth, we needed to transition from a Specialty Contractor to a General Contractor. As a certified Small Business Administration 8(a) and HUBZone company, we have set our sights on procuring work in the federal sector. In order to accomplish this goal, we now have the in-house capabilities to provide turn-key construction services. Our field personnel and office support staff each have more than a decade of experience in the construction industry.

Contracting for services is a key buying decision that should provide you with the highest level of experience, service and expertise available. EDCI stands behind our commitments. We are available to discuss your needs anytime. No-excuse service is critical because we want your business and need your confidence. Consequently, we are ever mindful that we must be responsive and provide you with the high-quality product you expect, on schedule and on budget.
